Tech Management Program

Introduction

Are you a tech professional ready to elevate your career into leadership roles?
The Tech Management Program is a transformative 6-month course designed to equip
experienced techies with the strategic, managerial, and leadership skills necessary to
lead high-performing tech teams and drive innovation.

Program Overview

Course Duration: 6 months

Facilitated by: George Njuguna (renowned Tech Leader)

Mode of Delivery: Part-time Classes (Online & In-person)

Tuition Fee: Ksh 250,000 Only | Flexible payment plans available.

This is an exclusive program with limited slots to ensure personalized attention and
impactful learning.

Why Enroll?

- **Expert-Led Training**: Learn directly from **George Njuguna,** a seasoned technology
  executive with over 24 years of experience, including leadership roles at Safaricom
  PLC, HF Group, and Commercial Bank of Africa.

- **Strategic Curriculum:** Gain insights into aligning technology with business
  objectives, effective team leadership, and delivering successful tech projects.

- **Mentorship:** Get personalized guidance and mentorship from different industry
  leaders to navigate your transition into management.

- **Career Advancement:** Position yourself for roles such as Tech Lead, Engineering
  Manager, or CTO, and become a catalyst for innovation within your organization.

Who is this program for?

- **Mid-level career tech professionals with 3+ years of experience** (developers, engineers, analysts, IT specialists)
- **Individual tech contributors** in teams looking to transition into leadership roles
- **First-time tech managers** seeking structured tech leadership training
- **Professionals in tech-adjacent roles** (project managers, business analysts, product managers) who want to strengthen their technical leadership skills

What are the entry requirements?

Must have 3 years of working experience in a technical role.

Availability & commitment to the 6-month duration

An aspiration to shift from an individual contributor to leading a technical team.

Must have a computer or laptop with the following specs (core i5 – i7, 8GB RAM, 500GB memory).

Proficiency in English – both spoken and written.

Course Outline

The program is designed around real-world case studies, instructor-led classes, and professional development sessions, helping participants develop both technical and leadership skills. Participants will also receive the monthly reading materials, including a list of books and case studies.

Each month will be divided into four week-long sections.

Day	Mode	Session	Learning Hours	Delivery
Week 1	Remote	Teaching and learning core concepts	3	Instructor Led
Week 2	Remote	1 Guest Lecture session	3	Industry Expert
Week 3	Remote	Case Study Review	6	Self-learning/ Group discussion
Week 4	In Person	All Day Monthly Review	8	Instructor Led
